

Before Installation: Look for Labels

CAUTION

DO NOT attempt to join luminaires together on the floor. Damage may result when lifted. Follow these instructions.

Hang luminaires in ID order. Hang prior to joining.
Hang, level, join, repeat to the end of the run.

- Identify all luminaires by their ID label in various places:
 - 1 label at each end of box (or bag)
 - 1 lable on box top (or bag top)
 - 1 label on luminaire (permanent)
- Keep plastic bags **ON** for protection. **NOTE:** T8 lamps may be turned on while still in their bags.
CAUTION: T5 and T5-HO lamps get too hot - remove bags before turning lamps on.

- Lay out luminaires starting with ID: 1, then ID: 2, etc.
- Hang STARTER luminaire ID: 1. Secure both ends to mounting aircraft cable and level.
- Hang far end of JOINER ID: 2 while supporting both ends.
- Join ID: 1 and ID 2 by attaching plug-together wiring, screwing luminaires together.
- **NOTE:** See Finelite.com for additional mounting and joining instructions for each Finelite Series.
